

INDROTEK

Delivering Tomorrow's Innovations, **Today**

ABOUT

INDROTEK is a holding group of a robotics ecosystem (InDro Robotics, Bravo Zulu, and Stratocom) that designs, integrates, leverages and operates trusted AI-powered aerial and ground systems for defence, critical infrastructure, and commercial customers.

Indrotek pairs proprietary modular autonomy platforms (like Cortex and Commander) with recurring data, maintenance, and software licensing services, which enables rapid autonomy deployments, unified situational awareness across all systems, and strengthened counter-UAS and data-collection solutions for contested or low-bandwidth environments.

DIVISIONS

**BRAVO
ZULU**

**INDRO
ROBOTICS**

STRATOCOM

Bravo Zulu, a division of Indrotek, is a leader in counter-drone security, providing advanced technology to protect critical assets and airspace. Their innovative solutions offer robust defense against unauthorized drone activity, serving the military, security, and marine sectors.

Long-Range Drone Detection
Adaptable

Award-Winning Technology
Counter Drone System

DIVISIONS

 BRAVO
ZULU

 INDRO
ROBOTICS

 STRATOCOM

As a division of Indrotek, InDro Robotics is an engineering-first R&D company that designs, integrates, and operates autonomous and remotely piloted systems for complex industrial missions, and generates a dual-revenue stream by also empowering other businesses with its proprietary modular technologies like Cortex and Commander.

Proprietary Engineered Software

Robotic Agnostic Systems

Integrated Aerial and Ground Robots

Commercial & Military Grade

DIVISIONS

 BRAVO
ZULU

 INDRO
ROBOTICS

 STRATOCOM

Stratocom, a division of Indrotek, employs proprietary aerial technology to revolutionize mass data collection for the utility industry. By utilizing airborne meter reading, Stratocom replaces time-consuming and inefficient ground-based methods, significantly boosting efficiency and reducing environmental impact.

Pioneering Aerial Data Capture
Boosts Operational Efficiency

Strong Sustainability Record
A Reliable and Trusted Service

TRACTION

INDROTEK reported USD \$4.4M in revenue in 2024 and is projecting USD \$7.5M in 2025, with a multi-year growth plan that scales into double-digit millions as government and commercial demand for AI autonomy and counter-UAS rapidly expands.

The company's diversified revenue model (hardware, software, licensing, data/services, and defence contracts) positions it to capture large addressable markets across defence, infrastructure, and industrial automation.

70% Growth in Revenue from 2024 to 2025

Revenue Sources from Diversified Sectors - Government, Infrastructure, Industrial and Commercial

COMPETITIVE ADVANTAGE

- Proprietary, modular autonomy stack (Cortex / Commander) that lowers integration time and cost for autonomy rollouts.
- Fielded solutions and operational experience (DroneRanger / counter-UAS) with government and enterprise partners that shorten procurement and deployment timelines.
- Recurring services and data streams that create high-visibility, long-term customer relationships/contracts (maintenance, analytics, licensing).
- Proven leadership team with deep insides and decades of experience in diverse markets
- Extraordinary advisory roster with senior defence and industry experts
- Existing customer base made of Fortune 500 companies - Some notable partners included

COMPETITIVE

Well-positioned across multiple verticals, which include defense, logistics, energy, commercial, and environmental monitoring.

Company	Ticker	Exchange	Focus	Revenue TTM USD millions	MarketCap USD millions (Snapshot Oct)	Revenue Multiple
AeroVironment, Inc.	AVAV	NASDAQ	Small UAS, tactical drones, loitering munitions, C2 & payloads (defense & commercial)	\$1080M	\$18B	16.66
Kratos Defense & Security Solutions	KTOS	NASDAQ	Uncrewed systems (tactical UAS), C2, mission systems, autonomous/defense electronics	\$1136M	\$13.6B	12.00
Ondas Holdings	ONDS	NASDAQ	Mission-critical private wireless networks, autonomous drone infrastructure, UAVs, AI	\$16.1M	\$2.43B	N/A
Red Cat Holdings	RCAT	NASDAQ	Products, services & solutions to drone industry (manufacturing, software, services)	\$7.3M	\$1.5B	208.22
Airo Group Holdings Inc.	AIRO	NASDAQ	Uncrewed Air Systems (drones), Electric Air Mobility (eVTOLs), Avionics, and Training	\$99.8M	\$542M	N/A
Unusual Machines, Inc.	UMAC	NYSE/AMEX	Commercial drone components (motors), small drones, FPV components & parts	\$7.7M	\$500M	64.94
Parrot S.A.	PARRO.PA	Euronext Paris	Professional & commercial drones (ANAFI line), drone software, services for mapping/inspection and defense/commercial applications.	\$82.8M	\$318M	3.84
Draganfly Inc.	DPRO	CSE / OTC (varies)	Drone manufacturer (public micro/industrial drones, public safety solutions)	\$6.56M	\$227.9M	34.74
Field AI	(Private)	Private	The company provides embodied AI technology that enables robots to operate in environments without GPS, pre-defined maps, or pre-programmed routes	Unknown	\$2B	Private
Skild AI	(Private)	Private / not listed	General-purpose AI (developer listed in image) — limited public financials	Unknown	\$1.1B	Private
Boston Dynamics	(Private)	Private (Hyundai ownership historically)	General-purpose robots / robot manufacturer (industrial & commercial robots)	Unknown	\$803M	Private
Sanctuary AI	(Private)	Private	General-purpose AI / humanoid robot manufacturer (private)	Unknown	\$168M	Private
INDROTEK	-	-	AI Drone & robotics ops, C2 software, data collection & monitoring (Bravo Zulu, InDro Robotics, Stratocom)	\$7.5M	TBD	Private
