

Saving Time, Money & Ensuring Safety for Meter Reading

The COVID-19 pandemic shifted business as we knew it. Industries were shaken and systems were blinded by a need to reduce manpower and pivot processes to adhere to new safety protocols with minimal human interaction.

“Stratocom was able to collect in five minutes what it took personnel several hours to complete driving” – Russell Wintersgill, Western Energy Magazine 17/18

Stratocom remotely captures meter readings for natural gas, water and electrical utilities in a fraction of the time currently offered in the market. Our team can provide you with the meter reading services to conduct business safely and securely during COVID-19.

It is vital that in this time of COVID-19 companies do all that they can to minimize the risk to their personnel and customers. Through our automated meter reading system, Stratocom can secure safety, efficiencies and reduced costs for utility companies to remotely capture meter data.

Stratocom means:

- Minimal personnel interaction
- No in-person customer interaction
- Huge geographic capabilities and efficiencies
- Low environmental footprint
- Time & Cost savings
